Air temperature measurement

The TG-K duct sensor has been designed for accurate air temperature measurement within the ventilation duct.

Internal mounting

The TG-K is designed to be mounted inside the duct with a sensor diameter of ø9 mm, a circular flange ø 40 mm and an adjustable length from 15 to 130mm.

Compatibility

The TG-K duct sensor is designed to be used with TTC, Pulser or RT 0-30

Technical parameters

Nominal data

Temperature adjustment	0 to 30 °C
------------------------	------------

Protection/Classification

Enclosure class	IP20
-----------------	------

Dimensions and weights

Weight	0.1 kg
